FREE GUIDE FOR ETSY SELLERS

How to read your Etsy Payment-account statement (2026)

A free guide for Etsy sellers. Facts checked October 27, 2026.

Etsy's monthly statement is the complete record of your money: every sale, fee, ad charge, refund, tax pass-through and bank transfer, one row each. It is also confusing. Fees show `--` where you expect numbers, deposits hide their amount in a sentence, and one order can produce eighteen rows. This guide explains each column and row type, and how to get from a month of rows to what you kept.

Samples come from real US, euro and UK statements, with order numbers replaced by `#1234567890`.

1. Where the statement lives

To get it: Shop Manager, then Finances, then Monthly statements, then View all monthly statements. Pick the year and month and choose **Generate CSV**. Etsy emails you a link ("Take me to download"); open it and choose Download CSV. You get one month per file, and generation is not instant.

Filename: `etsy_statement_YYYY_M.csv`, with no leading zero on the month: September 2026 is `etsy_statement_2026_9.csv`. The file begins with a UTF-8 byte-order mark.

Why not use the screen? Recent activities covers only the last 60 days.

The three balances (September 2026 redesign). Your Payment account now shows:

- **Current:** the balance your deposits are based on.
- **Pending:** money from sales Etsy has not released to you yet.
- **Total:** Current and Pending together.

Etsy's help article on the Payment account has the rules: https://help.etsy.com/hc/en-us/articles/115015747228.

2. The columns, one by one

COLUMN	WHAT IT HOLDS
Date	The day the row posted, as text.
Type	Sale, Fee, Marketing, Shipping, Tax, VAT, Refund, Deposit, Payment or Adjustment.
Title	What the row is. Often carries the order number or an item name.
Info	A reference: `Order #…`, `Listing #…`, a card, or (Etsy Ads) the date of the clicks. Blank on Sale and Refund rows.

COLUMN	WHAT IT HOLDS
Currency	Your payment-account currency.
Amount	Gross money on Sale and Refund rows. `--` everywhere else.
Fees & Taxes	The money on every other row. Negative is a cost, positive is a credit. `--` on Sale rows.
Net	What the row did to your balance. Equals Amount on Sale and Refund rows, Fees & Taxes on the rest.
Tax Details	`--` in every real statement we examined.
Status, Availability Date	New in the September 2026 layout (below).

Three things that trip people

1. `--` **means "not here," not zero.** Every non-Sale row has `--` in Amount and its value in Fees & Taxes. Sum Amount and you miss every fee. Sum **Net**.
2. **Money is text with symbols:** `$6.78`, `-$0.45`, `€28.68`, `-€0.17`, `£1,208.35`. Strip the symbol and commas, treat a leading minus as negative, treat `--` as empty.
3. **Dates are text, and the format depends on the shop.** US: `July 24, 2026`. The UK file we examined: `16 January, 2024`, with a zero-padded day. Parse them yourself.

Status and Availability Date. The July, August and September 2026 US files we examined have 11 header names: the usual nine plus these two. In all three, the data rows still hold only nine values, so neither column has anything we can read. What Etsy writes there is **unverified**. Older files had 9 columns (euro 2025, US April 2026) or 8 with no Tax Details (the UK file from 2024, tab-separated). Match columns by name, not position.

Rows run newest first, and within an order the fee rows sit above the Sale row.

3. Every row Type, and what the Title tells you

Class is how to treat the row: **income**, **cost**, **credit** (a cost reversed), **pass-through** (tax Etsy collects and remits; not yours, not a fee) or **movement** (money moving, neither income nor cost).

TYPE	TITLE PATTERN	INFO	WHAT IT IS	CLASS
Sale	`Payment for Order #1234567890`	blank	What the buyer paid: item, shipping and any tax collected. Positive in Amount.	Income (gross)
Fee	`Transaction fee: <item title>...`	`Order #…`	6.5% of the item price, one row per item; the title is cut off with `...`.	Cost
Fee	`Transaction fee: Shipping`	`Order #…`	6.5% of the shipping the buyer paid.	Cost
Fee	`Processing fee`	`Order #…`	Payment processing, on the total including tax.	Cost

TYPE	TITLE PATTERN	INFO	WHAT IT IS	CLASS
Fee	`Listing fee` or `Listing fee ($0.20 USD)`	`Listing #…`	$0.20 per listing or renewal. Non-USD shops show the USD price in the title and the converted amount in the columns (€0.19).	Cost
Fee	`Regulatory Operating fee`	`Order #…`	Charged only in certain countries (section 6).	Cost
Fee	`Credit for transaction fee on <item>`, `…on shipping`, `Credit for processing fee`, `Credit for Regulatory Operating fee`, `Credit for listing fee ($0.20 USD)`	`Order #…` or `Listing #…`	A fee returned, usually after a refund or cancellation. Positive.	Credit
Marketing	`Etsy Ads`	`Bill for click-throughs to your shop on Jul 29, 2026`	One row per day. Info is the click day; the row is dated the next day.	Cost
Marketing	`Fee for sale made through Offsite Ads`	`Order #…`	15% or 12% of the order total, capped at $100.	Cost
Marketing	`Credit for Offsite Ads fee`	`Order #…`	That fee returned after a refund.	Credit
Shipping	title containing "shipping label"	`Label #…`	Label purchase; voids return as credits. From third-party parsers, not our real files: **text unverified**.	Cost
Tax	`Sales tax paid by buyer`	`Order #…`	Etsy collects and remits the tax. The negative row cancels the tax inside the Sale gross.	**Pass-through, not a fee**
Tax	`Refund to buyer for sales tax`	`Order #…`	The tax returned on a refunded order. Positive.	Pass-through
Tax	`Tax: Transaction`	`Order #…`	Tax charged *on a fee*. Small: -$0.01 and -$0.02 in our files.	Cost
VAT	`VAT: Processing Fee`, `VAT: transaction`, `VAT: shipping_transaction`, `VAT: Regulatory Operating fee`, `VAT: Offsite Ads fee`, `VAT: listing`, `VAT: auto-renew sold`	`Order #…`, `order: …`, a transaction or listing number, or blank	VAT on Etsy's fees (UK and EU shops); 20% of each fee in the UK file. `… credit` versions are positive.	Cost, or credit if positive
Refund	`Refund to buyer for Order #1234567890`, `Partial refund to buyer for Order #1234567890`	blank	Money returned to the buyer. Negative in Amount and Net.	Income reversed
Deposit	`€20.51 sent to your bank account`	blank	A transfer to your bank. **The amount is only in the Title**; all three money columns are `--`.	Movement
Deposit	`Returned deposit`	blank	A transfer that came back. Positive.	Movement

TYPE	TITLE PATTERN	INFO	WHAT IT IS	CLASS
Payment	`Card Payment`	`MasterCard ending in 0000`	A card payment into your account. Positive. Our July sample is $0.20; the file does not say why.	Movement
Adjustment	varies (`Reserve release`, `Manual correction` in one small sample)	varies	An Etsy-made correction, positive or negative.	Review each

Rarer rows (third-party sources, wording unverified): auto-renew listing variants, Buyer Fee, and a one-time shop set-up fee with a credit under Type Payment. Review any Title you do not recognize.

Order number: Info or Title? Sale and Refund rows carry it in the Title (Info is blank). Fee, Offsite, Tax and Etsy-credit rows carry it in Info. VAT rows are unreliable: Info may say `Order #…`, `order: …`, a transaction number, or nothing, so some match an order only by sitting beside it in the file.

Do not assume every order has a "Sales tax paid by buyer" row. Only 8 of the 59 orders in our UK file do.

---

4. Worked examples

A US order (September 2026)

The five rows, exactly as they appear in the file:

```
"September 3, 2026",Tax,"Tax: Transaction","Order #1234567890",USD,--,-$0.02,-$0.02,--
"September 3, 2026",Fee,"Transaction fee: Digital geometric embroidery pattern — b...","Order
#1234567890",USD,--,-$0.39,-$0.39,--
"September 3, 2026",Tax,"Sales tax paid by buyer","Order #1234567890",USD,--,-$0.78,-$0.78,--
"September 3, 2026",Fee,"Processing fee","Order #1234567890",USD,--,-$0.45,-$0.45,--
"September 3, 2026",Sale,"Payment for Order #1234567890",,USD,$6.78,--,$6.78,--
```

STEP	AMOUNT	WHY
Sale (gross)	$6.78	What the buyer was charged
Sales tax paid by buyer	-$0.78	Pass-through; leaves **$6.00** of real revenue
Transaction fee	-$0.39	6.5% of $6.00
Processing fee	-$0.45	3% of $6.78 plus $0.25 (tax is in the base)
Tax: Transaction	-$0.02	Tax on the fee
You keep	**$5.14**	Sum of Net on the five rows

Revenue $6.00, Etsy's costs $0.86, you keep $5.14 before your materials and postage. A listing fee dated the same day belongs to a listing, not this order.

A refunded UK order (January 2024)

Sold January 1, refunded January 16. Net column shown; all rows are GBP. On January 1:

TYPE	TITLE	INFO	NET
Sale	Payment for Order #1234567890		£17.37
Fee	Processing fee	Order #1234567890	-£0.89
Fee	Transaction fee: Personalised Name Night Light for Baby,A...	Order #1234567890	-£0.78
Fee	Transaction fee: Shipping	Order #1234567890	-£0.35
Fee	Regulatory Operating fee	Order #1234567890	-£0.06
VAT	VAT: Processing Fee	Order #1234567890	-£0.18
VAT	VAT: transaction	transaction: 5550000001	-£0.16
VAT	VAT: shipping_transaction		-£0.07
VAT	VAT: Regulatory Operating fee		-£0.01

On January 16:

TYPE	TITLE	INFO	NET
Refund	Refund to buyer for Order #1234567890		-£17.37
Fee	Credit for processing fee	Order #1234567890	£0.89
Fee	Credit for transaction fee on Personalised Name Night Light for Baby,A...	Order #1234567890	£0.78
Fee	Credit for transaction fee on shipping	Order #1234567890	£0.35
Fee	Credit for Regulatory Operating fee	Order #1234567890	£0.06
VAT	VAT: Processing Fee	order: 1234567890	£0.18
VAT	VAT: transaction credit	transaction credit: 5550000001	£0.16
VAT	VAT: shipping transaction credit		£0.07
VAT	VAT: Credit for Regulatory Operating fee		£0.01

- **The sale:** £17.37 minus £2.08 of fees minus £0.42 of VAT on them leaves **£14.87**.
- **The refund:** the buyer gets £17.37 back, and Etsy credits back all four fees and all four VAT amounts, £2.50 in total. Net **-£14.87**.
- **Both together:** exactly **£0.00**. A fully refunded order costs you no Etsy fees, but the credits post on the refund date, possibly a different month than the sale.

A different £17.37 order in that file came through Offsite Ads, adding `Fee for sale made through Offsite Ads` at -£2.08 (12% of £17.37, the lower rate) and `VAT: Offsite Ads fee` at -£0.42. A refund returns both as credits.

5. Why your deposit isn't your profit

A deposit is money Etsy moved to your bank from your **Current** balance. It does not measure a month:

1. **It batches days.** One deposit covers all net activity since the last one, often across two months.
2. **It leaves out Pending.** Sales not yet released are not in Current, so not in the deposit.
3. **It comes before your own costs.** Materials, postage bought elsewhere and software are not on this statement.
4. **Refunds and returns lag.** A refund and its credits can post weeks after the sale, and a bank can send a deposit back. In the September 2026 file, `$0.33 sent to your bank account` on September 8 was followed by `Returned deposit`, +$0.33, on September 11.

How to tie a deposit to activity. Sort the file oldest to newest and keep a running total of **Net**. At each Deposit row, the running total is that deposit; then reset to zero. In our euro file all three January 2025 deposits tie to the cent:

DEPOSIT	NET SINCE THE PREVIOUS DEPOSIT
`€19.96 sent to your bank account` (Jan 6)	€19.96
`€99.30 sent to your bank account` (Jan 24)	€99.30
`€20.51 sent to your bank account` (Jan 30)	€20.51

The first deposit of a month needs the previous month's tail; subtract still-pending sales before comparing.

6. The 2026 fee schedule

Source unless noted: Etsy's fee policy, https://www.etsy.com/legal/fees (last updated October 5, 2026).

FEE	RATE	EFFECTIVE
Listing	$0.20 per listing; lasts 4 months or until sold, then auto-renews; multi-quantity renewals are charged per quantity sold	Unchanged
Transaction	6.5% of item price + shipping + gift wrap (excludes US sales tax)	6.5% since April 11, 2022 (5% before)
Payment processing	By country, on the total sale price including shipping and sales tax; credited proportionally on a refund. List below. Source: https://help.etsy.com/hc/en-us/articles/115015628847	Current as of October 2026
Offsite Ads	15% of the order total; 12% once the shop has $10,000+ in sales in the prior 365 days (permanent). Capped at $100 per order. 30-day attribution; opt-out only under $10,000. If the last click was Etsy Ads, only the Etsy Ads cost applies.	Current

FEE	RATE	EFFECTIVE
Regulatory Operating fee	Canada 0.50%, France 1.14%, Hungary 1.97%, Italy 0.80%, India 0.05%, Spain 0.88%, Türkiye 1.67%, UK 0.48%, Vietnam 1.24%. None for the US or Australia. Base: item + shipping + gift wrap + personalization; VAT where relevant. https://help.etsy.com/hc/en-us/articles/1500011073202	**June 22, 2026** (announced April 22): France 0.47 to 1.14, Hungary new, India 0.29 to 0.05, Italy 0.32 to 0.80, Spain 0.72 to 0.88, Türkiye 2.27 to 1.67, UK 0.32 to 0.48. Date per third-party https://growtsy.com/etsy-changes
Currency conversion	2.5% when the listing currency differs from your payment-account currency	Current
Etsy Plus	$10 per month	Current

Processing fee by country (percentage plus a fixed amount per order):

- **US** 3% + $0.25. **UK** 4% + £0.20. **Eurozone** 4% + €0.30.
- **Canada** 3% + 0.25 CAD domestic and US, 4% + 0.25 CAD international. **Australia** 3% + 0.25 AUD domestic, 4% international. **New Zealand** 3% + 0.30 NZD domestic, 4% international.
- **Denmark** 4% + 2.50 DKK. **Norway** 4% + 2.50 NOK. **Sweden** 4% + 3.00 SEK. **Switzerland** 4% + 0.50 CHF.
- **Hong Kong** 4.4% + 2 HKD. **Singapore** 4.4% + 0.35 SGD. **India** 5% + 25 INR.
- **4.5%:** Indonesia + 7,000 IDR; Israel + 2 ILS; Malaysia + 2 MYR; Mexico + 8 MXN; Morocco + 5 MAD; Philippines + 25 PHP; South Africa + 8 ZAR; Vietnam + 11,500 VND.
- **6% + $0.30 USD:** Japan, Thailand, Ukraine. **Türkiye** 6.5% + 14 TRY.
- **6.5% + $0.30 USD:** Argentina, Brazil, Chile, China, Egypt, Georgia, Kazakhstan, Pakistan, Peru, Serbia, South Korea, UAE.

Left out as unverified: the statement titles for currency-conversion and Instant Transfer fees, and third-party reports of other fees.

7. What changed in 2024 to 2026, and what will change again

- **September 2024:** a one-time shop set-up fee, per a third-party report (unverified).
- **2025 to 2026:** the titles `Tax: Transaction` and `Listing fee ($0.20 USD)` (non-USD shops) appear.
- **February 13 and October 5, 2026:** fee-policy revisions with no rate change.
- **June 22, 2026:** Regulatory Operating fee rates changed in seven countries; Hungary added.
- **September 2026:** the Payment account moved to Current, Pending and Total balances, and US statement headers grew from 9 names to 11.

What to re-check: the fee policy page and the regulatory operating fee help article. Rates change more often than the file layout, and the layout changes without notice. Anything that hard-codes column positions or title text breaks first.

Checked October 27, 2026.

8. What a spreadsheet has to do to read this file

1. **Classify by Type plus Title,** not Type alone. A Fee row can be a cost or a credit, a Tax row a pass-through or a cost, and a Deposit's amount lives in its Title.
2. **Treat credits as negative fees.** Positive Fees & Taxes on any `Credit for…` or `VAT: … credit` row reduces your fee total.
3. **Keep pass-through tax out of fees.** `Sales tax paid by buyer` and `Refund to buyer for sales tax` offset tax inside the Sale gross; revenue ex-tax is the Sale plus that negative row.
4. **Parse deposits from the Title,** and subtract `Returned deposit`.
5. **Match columns by header name,** not position: files have had 8, 9 and 11 headers, and rows can be shorter than the header.
6. **Read UTF-8 with a BOM,** keep order numbers as text, and parse each date format yourself.
7. **Group fees by the text before the colon,** not the full Title, because item names are embedded.

> If you would rather not build this yourself, **Etsy P&L from CSV** is a spreadsheet that does all seven: [SHOP LINK].
